

GOVERNMENT APPROVED

# TRAXO AIS 140

TRACKING DEVICE  
WITH IRNSS

design by: Payal Graphics

**PROFILE**  
2023-2024

AIS 140 certified VLTD tracking Device •  
ICAT certified VLTD tracking Device •  
SOS Button •  
Embedded eSim •  
Dual Network Sim •

**Traxo India Automation** is a trusted name in the field of Vehicle tracking. **TRAXO** Vehicle Location Tracker is approved by ICAT as per AIS 140 Norms equipped with eSIM and IRNSS modules. We are the pioneers in AIS 140 Vehicle trackers as they are built by State of the art, engineering and design teams. **Traxo** India Automation would strive to provide world class and stable Hardware and Software vehicle tracking solutions that would make a positive impact on the productivity and profitability of its Clients.

# Traxo

## India Automation

The AIS 140 or the Intelligent Transportation System (ITS) is basically a set of requirements. As per this requirement, the government has mandated to put AIS-140 GPS Tracking System to place in all public transportation systems namely trucks, cars, taxis, school buses and other types of commercial vehicles among others. The government of India has come up with this Intelligent Transport System (ITS) under the Automotive Industry Standard-140 (AIS 140) with the motive to increase and ensure the efficiency of the transport system.

### About Us

The reason behind the implementation of AIS-140 is the rapidly increasing on-road vehicles. Therefore, the government must intervene to impose some guidelines specifying safety and emergency standards in all kind of public transport systems. The most consistent utilization and strict conformity of AIS-140 guidelines can help in the easiness of on-road congestion, reduce the environmental impact and improve traffic management. Traxo is one of the leading providers of GPS based Fleet Tracking solutions. Traxo AIS-140 GPS tracker can help you monitor and regulate your vehicle with ease. The device makes it a way easier job for you to track and locate any vehicle anytime.

At Traxo, we have an extensive range of world-class AIS 140 GPS approved GPS trackers for commercial vehicles. Our AIS-140 tracking devices add value to our clients in terms of having a top quality and reliable device by making tracking easier.

For Fleet Management

# Features

## ► Real-Time 24x7 GPS Tracking

Last location saving  
Single Screen Fleet Management

## ► Event Alerts

Overspeeding alert  
Idling Alert  
Geo-fence Alert  
Motion Alert  
Analog Sensor Alert  
Long Stop Alert  
Engine on/off Alert  
Battery Tampering Alert

design by: Payal Graphics

## ► MIS Reports

Dashboard  
Log Report  
History Report  
Geo Fence Report  
Route Deviation Report  
Summary Report  
Halt Report  
Tracking History  
Fuel Monitoring

## ► SOS

SOS Button enables the customer to transmit a silent distress signal when they are in critical situation like theft, accident or other dangers. As soon as the driver presses the SOS button, it triggers a message to fleet Manager/government via a SMS and Email as selected by the user in its preference.

# Features

## ► Geo Fence

TRAXO Tracking Device offers Geo-fencing. TRAXO Tracking Device Geo-Fence feature allows you to quickly and easily set up geographic boundaries around specific areas and then receive automated alerts via SMS or email whenever a vehicle enters or exits those boundaries.

## ► Hard Acceleration

It helps a fleet manager or an organization to monitor Harsh ACCELERATION as it may cause: Speeding Excessively Wasting fuel

Increasing the risk of an accident  
Engine deterioration due to excessive revving (High RPM)

## ► Harsh Braking

It helps a fleet manager or an organization to monitor Harsh Braking as it may cause: The brake discs to heat up and warp, Wear the brakes pads faster, Lower fuel efficiency, Not safe for passengers, Increased risk of an Accident

## ► Remote Shutdown

TRAXO Tracking Device give the fleet owners the ability to remotely immobilize a vehicle in case of theft or any other form of unauthorized use of a vehicle.

# FUEL MONITORING

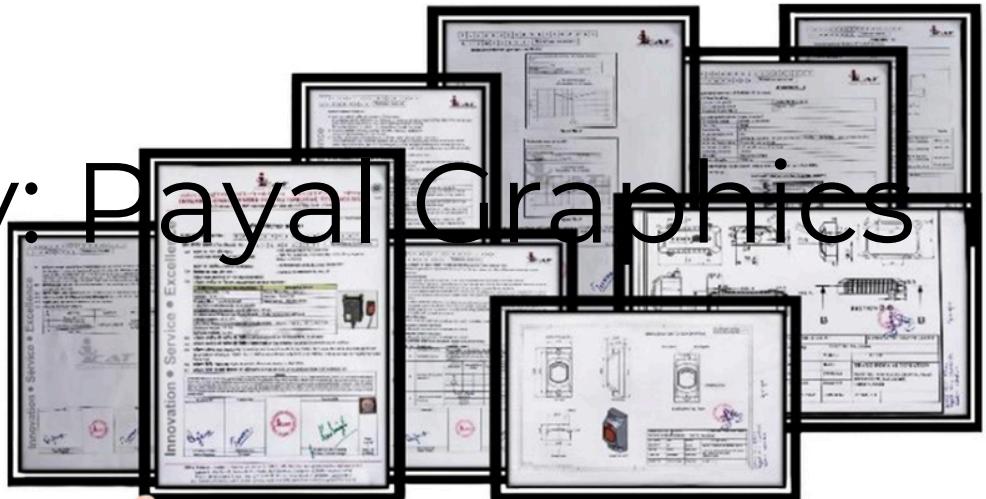

“ Our fuel level sensor works with our GPS tracking device to send live fuel monitoring data to our server and help us do real time monitoring of fuel volume and fleet tracking.

# CONNECTIONS

- Ignition
- AirCondition
- Head Lights
- Doors Open Close Status
- AutoClose doorsremotely
